EDUCATION

Tufts University

Medford, MA

Bachelor of Arts in Computer Science, Minor in Mathematics

Graduating 2026

- GPA: 3.6
- Relevant Coursework: Algorithms, Artificial Intelligence, Data Structures, Machine Structure and Assembly Language Programming, Bridge to Higher Mathematics, Programming Languages

SKILLS

Languages: JavaScript, Python, C/C++, MYSQL, OracleDB, HTML/CSS, C#

Frameworks: Nodejs, Express.js, React.js, Spring, Jte

Developer Tools: Git, Jira, VSCode, IntelliJ, Maven, Jenkins, Linux, Bash, Unity

Libraries: Pandas, Matplotlib PyPDF, PyMuPDF, BeautifulSoup4, RenPY, Aggrid-React, Liquibase

EXPERIENCE

Depository Trust and Clearing Corporation

Boston, MA

Full-Stack Developer Intern

June 2024 – August 2024

- Designed and deployed React.js search pages, enabling users to quickly access and retrieve relevant data.
- Developed and maintained Java Spring backend API endpoints to support UI development, accelerating page creation and feature delivery.
- Reviewed and modernized legacy JS codebase, providing best-practice guidance to improve maintainability.

Depository Trust and Clearing Corporation

Boston, MA

Backend and Database Developer Intern

June 2025 – Current

- Leveraged Liquibase to refactor Oracle database schemas, improving maintainability and enabling robust version control and rollback features.
- Modernized Spring XML template system using JTE, resulting in a more readable and concise codebase.
- Collaborated to resolve database and deployment pipeline issues by applying communication and analytical skills.

Chryselys

Remote

Software Development Intern

June 2023 – August 2023

- Engineered data visualization that allows team to see commonly used keywords from a pool of tweet timelines
- Designed table-to-spreadsheet web scraping tool, eliminating the need for manual data entry
- Led the development of a PDF comparison tool that detects and highlights the differences between two PDF documents.
- Engineered algorithm that detects difference between "moved" and "unique" text for PDF comparison tool

Tufts Privacy and Security Lab

Medford, MA

Researcher/Assistant

March 2024 – Current

- Working on university-led cybersecurity clinic study with the Tufts Privacy and Security Lab
- Conducted and helped with interviews, gathering data for qualitative analysis for study
- Utilized qualitative coding to analyze and organize data into readable data

PROJECTS

CY-BORG Sheet | Personal | *HTML, JS, Node, SQLite3*

June 2023 – Present

- Developed a website for storing character sheets and data for the TTRPG CY-BORG online
- Both character and user data is stored on website backend, allowing user to easily save data and retrieve character sheets through a login system
- Table saving and retrieving system built with javascript and nodes allows for easy saving of different items
- Used Node.js, Express.js, and Sqlite3 for backend, allowing scalability through async programming
